

A woman with dark hair is lying back in a hot tub, her eyes closed in a state of relaxation. Water is being sprayed over her head and neck from a jet, creating a misty, refreshing atmosphere. She is wearing a dark-colored top with a red floral pattern. The background is dark, suggesting an indoor or nighttime setting.

Oxygen Spa

Oxygen Spas are dedicated to a simple vision: To enable busy persons to create daily enjoyment, quality time and overall well-being with a ready and waiting oasis right in their own homes. Oxygen spas success in this pursuit has earned numerous national awards and international recognition.

Our vision, passion and quality standards are at the center of the company, manifesting in products that are unmatched in the industry while inspiring the imagination and changing the way you feel.

Wide Selection

Oxygen Spas offer the most hot tubs molds in the industry, ranging from intimate models to oversized spas you can swim in. Add thousands of option combinations and you're guaranteed to have a hot tub that best represents you.

A Proven Record

Oxygen Spa Hot Tubs have earned several distinctions such as Spasearch Certification for several years. Consumer Best Buy Awards and recognition in energy efficiency.

Standard Of Excellence

Enjoy your hot tub with peace of mind, knowing that each spa design is listed with the CE, ROHS, C-TICK, SAA, UL and ISO a third-party organization that demands the most rigorous safety standards.

Value

No other manufacturer packs as many standard features into one spa as Oxygen spas. You have a choice and Oxygen spas rewards your decision to bring us into your home by offering you the highest quality products at unbeatable value. Experience what so many others around the world are already enjoying. Embrace the Oxygen spas Home Resort lifestyle in your home and discover the relaxation you didn't know you couldn't live without.

The Production

Each Oxygen Spa and hot tub is produced with the highest precision. Our specialised engineers and experienced production team craft each spa to last for several years.

Durability

The strongest spa shell in the world. Durability is paramount when it comes to your home investments. That's why Oxygen spas utilize an exclusive Fiber. The finest Acrylic Sheets are vacuum molded into shape, then reinforced with vinyl ester and fiberglass. After curing, the shell receives a resin filler coat, fiberglass and calcium carbonate. Stiffener reinforcement supports and 1 inch angled irons are added to ensure maximum strength. A final filler coat applied to seal, bond and toughen the overall structure.

Reinforcement

Each Oxygen spa is built on a structure of pressure treated wood reinforced framework, that resists corrosion decay and insect damage. The frame is constructed from a sturdy desing of rails and cross-bracings which are secured by 1-inch galvanized staples for solid strength, while vertical supports are shored with plywood corner gussets and vertical angle bracings.

Efficiency

Our spas are 12% more energy efficient than foam filled spas. Oxygen Spas are among the most energy efficient in the world, using as little as 138kWh per month to operate. Providing an R-20 value, our Weather Pro RTB insulation harnesses all thermal gain from the pumps and heater inside the spa cabinet, while reflecting the colder air away from the spa cabinet - thus heating the spa shell and water. Our Insulation also contains natural borates which are undesirable to insects and rodents.

Certified to the California Energy Commission

Energy efficiency has never been so important and that's why every component designed and engineered to come together to create the most energy efficient spa system. Oxygen spas are among the few manufacturers to be certified by the California Energy Commission's stringent Title 20/ Section 1606 energy standards for portable spas

Insulation

Perhaps you've heard horror stories about the cost of heating a spa. Relax. This is where Oxygen-Smart insulation desing amkes all the difference.

Cabinet Design

Every Oxygen spa is manufactured with elegant and durable paneling to protect your investment and add lasting sophistication to our Home Resort. The panels protect the spa equipment from the elements, but they are easily removable if maintenance is required. Oxygen spa also provide protection for the underside of your spa with a resilient bottom tray that serves to keep out rain, dirt and pests.

Advantages to Oxygen spa cabinets includes:

🌸 No warping, shrinking and decay

🌸 Moisture resistant

🌸 No cracking splitting or chipping

🌸 Flame retardant

🌸 Soundproof

🌸 Heat retention for lower operating cost

🌸 Removable panels for easy access

🌸 Oxygen Classic Panels

🌸 Oxygen FGC Panels

🌸 Exclusive Oxygen Teak

🌸 Corner Cabinet Lighting

PEACEFUL HOME
